About us

The Sycamore Creek workshop is located in New York's rural Hudson Valley nestled between the Catskill and Berkshire Mountains. In our barn, amid rolling hillsides and tree-lined streams, we handcraft our unique line of original design copper furnishings for the garden and home.

Our Products

Made of copper piping, pieces are sturdy, with a lightweight elegance. Both durable and attractive; copper is enhanced with age and requires absolutely no maintenance.

Our designs reflect years of gardening experience, and a keen eye. We use clean balanced lines that look great and work well in the garden. We think that you'll be pleased with our selection of styles and designs.

Each piece is individually constructed, often using a combination of solder and brazing. Trellises and arbors are hand finished to hasten copper's natural aging, for a verdigris patina.

Custom projects are welcomed.

DESIGNED TO AGE BEAUTIFULLY AND LAST FOREVER

Products identified with this icon are available as kits

Garden Tower

A great form for growing roses, vines, and climbers, our version of the classic garden obelisk is topped with a zinc finial point. This lovely garden ornament will provide decorative vertical interest in the garden.

18" diameter x 9' tall

Torch

Light up your nights in the garden. Each torch comes with an installation rod and lasting fiberglass wick. Fill the cylinder with any outdoor lamp oil - holds enough oil for over 6 hours of illumination.

Garden Stakes

Offered in 3 heights: 18, 38 and 60 inches.

Support your plants elegantly with our copper and zinc garden stakes. The 18" size also works as a hose guard. Built to withstand the elements, you'll find the 1/2" copper pipe extremely sturdy. Our garden stakes are decorative, durable, and easy to install with an angled base and can actually be hammered into the ground. These pieces are left untreated (no patina).

To Order: 518-398-6393 www.sycamorecreek.com

Specializing in trellises and arbors, we strive to provide the finest copper garden structures available.

Our designs work equally well with plants or on their own as attractive garden ornaments. We realize that a trellis needs long legs to get off the ground, proper support for stability, and enough height to guide your vines.

For recommendations regarding installation, please see the last page of the catalog.

The Hudson Trellis combines copper's natural beauty and durability with classic design. This popular trellis has inspired a pair of companion trellises - the Rhinebeck and the Rhinecliff. These trellises are designed to coordinate with our Hudson trellis and with each other. They can be used either individually or in combination.

Hudson Trellis 32" x 7'

The Rhinecliff and Rhinebeck Trellises

Rhinebeck Trellis
24" x 6'

A pair of Rhinecliff trellises flank a Rhinebeck Trellis (above) and a Hudson Trellis (right).

Empire Trellis
Small - 14" x 5' 6"
Large - 20" x 7' 4"

Apple Ladder
16" x 6' 6"

Olana Trellis
14" x 4' 9"

Sycamore Trellis
24" x 6' 6"

To Order: 518-398-6393 www.sycamorecreek.com

Chelsea Trellis
3' x 6'6"

Available left- or right-sided and as a pair. Used in a pair, these trellises are a charming way to frame a corner. They also look fantastic on either side of our Saratoga Arbor.

Simple grid-based designs can work wonders in the garden. These pieces have proven to be extremely versatile. Create an outdoor room by defining an area or blocking a view. Use to cover a wall or train a vine. Sycamore Creek's grid trellises are built of one-foot squares, and available in standard and custom sizes. Call with your size requirements.

Greenwich Trellis
5' x 6'

A version of our grid, with a low arch and fan added to the top.

2 Small Grid Trellises
5' x 5' each

Taghkanic Trellis
32" x 7'

Small Grid Trellises - 5' x 5'
Shown used to frame a corner supporting roses.

Clermont Trellis
3' x 8'

ARBORS

Structure in the Garden

The Arbor is one of the classic architectural elements used in the garden.

Our copper arbors will provide a lifetime of beauty.

Monet Arbor

Single Arch - 5' wide 8' tall, c

Custom pipe diameters available

Berkshire Arbor

Arbors provide an elegant support for vines and climbers, while creating a focal point for entries and pathways.

What better way to add charm and grace to a garden than with an arbor?

ARBORS

ARBORS

The Classic and Adirondack arbors utilize the familiar romantic arch while our Saratoga Arbor has a long low arch reminiscent of Monet's elegant garden.

Adirondack Arbor
4' x 25' x 8'

Arbor Construction and Installation

All of our arbors are fully constructed (except our Classic Kit) using solder and brazing techniques and shipped ready for installation. They are constructed of a 3/4" copper pipe frame with 1/2" pipe for the interior.

Arbors are shipped flat in a large box - the top portion is disassembled for shipping. To re-assemble, the top slips firmly into the side panels. Solder and tools are not required for assembly. However, we do include optional retaining compound to secure the few pieces re-assembled.

As with any garden structure, arbors must be properly installed. An arbor installation kit, consisting of galvanized stakes, hardware, and directions, is included with your arbor.

Oxbow
5' x 10' x 8'6"

Classic Arbor
4' x 20' x 8'10"
Also available with 26" deep sides and as a kit.

Hampton Arbor
5'5" x 25' x 8'6"

Saratoga Arbor
6' x 25' x 8'

Gallatin
A great little table
17" x 17"

Catskill
17" x 36"

Woodstock
24" or 30" diameter

Our tabletops, of locally quarried bluestone, rest on copper bases. The beauty of natural stone combined with the strength and elegance of copper creates a unique garden furnishing.

Tables & Custom Work

We've had excellent results working with landscape architects, designers and gardeners. We welcome the opportunity to customize one of our designs or fabricate one of yours.

To Order: 518-398-6393 www.sycamorecreek.com

Construction: Our pieces are generally soldered and shipped ready for installation - with little or no assembly required. Please also see arbor pages and trellis hardware below.

Kits: Our kits contain everything required to create your own professional quality garden structure including: detailed illustrated instructions, precision cut copper piping, fittings, and a specially formulated retaining compound (no solder or welding required).

Trellis Hardware & Installation: Installation will vary according to site and use. Generally, trellis legs should be inserted in the ground a few inches while the upper portion of the trellis is secured several inches from a wall. (See brackets below)

Trellis Extensions: If you plan to insert your trellis more than a few inches in the ground, we can extend the legs to accommodate your needs. Freestanding trellises should be buried to a depth of 2 feet. We recommend that a section of metal rod be inserted the length of the trellis legs for added strength.

Trellis Mounting Options: We offer two options for mounting your trellis 6" from a wall.

Trellis Mounting brackets: A pair of copper clad split-ring holders fit securely around the trellis while the brackets attach to the wall. The copper clad split-ring holder can be positioned where desired, but they rust quickly if left untreated.

Built-in Trellis Brackets: Built-in brackets must be ordered with your trellis. Rather than a split-ring holder fitting around the trellis, a 6" length of copper connects directly to the trellis. This is connected to a brass flange that is screwed to the wall.

Pot Adapter: Small trellises (Olana, Empire, and Cardinal Climber) can be used in a container by adding our adapter. It fits onto the trellis base to provide stability when buried in soil.

Patina: Our fully assembled trellises are treated with a chemical formula to bring out a natural verdigris patina that may otherwise take years to develop. If you prefer, you may have your arbor or trellis left untreated. Our kits do not contain this patina, but we do offer this formula for sale separately.

Shipping: Shipping costs are indicated on our price list after each item. Our assembled trellises and arbors are shipped flat in a large box.

Sizes noted throughout our catalog are to the nearest inch.
